natural killer cell tumor-recognition protein - human
N;Alternate names: cyclophilin-related NK-tumor recognition protein; natural killer-tumo
C;Species: Homo saplens (man)
C;Date: 10-Sep-1999 #sequence_revision 10-Sep-1999 #text_change 24-Sep-1999
C;Accession: A47328
R;Anderson, S.K.; Gallinger, S.; Roder, J.; Frey, J.; Young, H.A.; Ortaldo, J.R.
Proc. Natl. Acad. Scl. U.S.A. 90, 542-546, 1993
A;Title: A cyclophilin-related protein involved in the function of natural killer cells.
A;Reference number: A47328
A;Tatle: A cyclophilin-related protein involved in the function of natural killer cells.
A;Recession: A47328
A;Status: preliminary
A;Molecule type: mRNA
A;Residues: 1-1403 AND>
A;Cross-references: GB:LO4288; NID:g181251; FIDN:AAA35734.1; PID:g181252

Rifortini, M.E.; Lai, Z.; Rubin, G.M.

A.Title: The Drosophila zfh-1 and zfh-2 genes encode novel proteins containing both zind

A.Reference number: S33641; MUID:92001539

A.Accession: S33642
C; Accession: T32077

R; Graves, T.; Wohldmann, P.; Clarke, K.
submitted to the EMBL Data Library, July 1997

A; Description: The sequence of C. elegans cosmid F22E5.

A; Reference number: 221119

A; Accession: T3207

A; Accession: T3207

A; Status: preliminary; translated from GB/EMBL/DDBJ

beta-fructofuranosidase (EC 3.2.1.26) LIN7 - tomato (fragment)

Nathernate names: invertase

C; Alternate names: invertase

C; Species: Lycopersicon esculentum (tomato)

C; Date: 30-Apr-1999 *sequence_revision 30-Apr-1999 *text_change 21-Jul-2000

C; Accession: T07068

glucose-1-phosphate adenylyltransferase (EC 2.7.7.27) chain wml2 - Watermelon Shucose-1-phosphate adenylyltransferase (EC 2.7.7.27) chain wml2 - Watermelon N.Alternate names: ADPglucose pyrophosphorylase chain wml2; ADPglucose synthase chain S. G.Species: Citrulus vulgaris S. C.Sateries: Citrulus vulgaris S. C.Sateries: Citrulus vulgaris S. C.Sateries: Lo-Jul-1998 #sequence_revision 10-Jul-1998 #text_change 07-May-1999 C.Accession: JE0132 F. F. Chung, W.I. Biosci. Biotechnol. Blochem. 62, 550-555, 1998 A. Title: Characterization of cDNAs encoding small and large subunits of ADP-glucose p. A. Reference number: JE0131; MUID:98233279 A. Molecule type: mRNA A. Molecule type: mRNA A. Molecule type: mRNA C. Superfamily: glucose-1-phosphate adenylyltransferase C. Keywords: nucleotidyltransferase
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |||::: :::||| ||| |||

XhoI; This cDNA library was constructed from mRNA isolated
from immature flowers of field grown plants. The cDNA
library was prepared using the Stratagene pBluescript II
XR library construction kit. Complementary DNA was
synthesized from mRNA using a primer consisting of a poly
(dT) sequence with a XhoI restriction site. ECORI adapters
were ligated to the blunt-ended cDNA fragments followed by
XhoI digestion. The cDNA fragments were directionally
cloned into the ECORI-XhoI restriction site of the
pBluescript vector. The ligated cDNA fragments were
transformed into XLIO-Gold host cells. This library was
constructed by Dr. Randy Shoemaker and Dr. John
